Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Status of the Application*

Claims 15-53 are pending in the application.

Applicants' cancellation of claims 1-14 and addition of claims 15-53 in Paper No. 5 is acknowledged.

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 15-21, drawn to a recombinant kinase, classified in class 435, subclass 194.
  - II. Claims 22-46, drawn to a DNA encoding and vectors, host cells, and methods for the production of a recombinant kinase, classified in class 435, subclass 194.
  - III. Claims 47-53, drawn to methods for the production of a nucleoside monophosphate, classified in class 435, subclass 89.
2. The inventions are distinct, each from the other because:

The polynucleotide of Group II and the polypeptide of Group I each comprises a chemically unrelated structure capable of separate manufacture, use and effect. The polynucleotide of Group II has other utility besides encoding polypeptides such as a hybridization probe, the polypeptides of Group I can be made by another method such as purification from the natural source.

The polynucleotide of Group II is unrelated to the method(s) of Group III as it is neither used nor made by the method(s) of Group III.

The polypeptide of Group I and the method of Group III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the polypeptide of Group I can be used as an antigen in the production of antibodies.

Because these inventions are distinct for the reasons given above and a different search required for each of the inventions listed as Groups I-III, restriction for examination purposes as indicated is proper. "For purposes of the initial requirement, a serious burden on the examiner may be prima facie shown if the examiner shows by appropriate explanation either separate classification, separate status in the art, or a different field of search as defined in MPEP 808.02" (see MPEP 803). Each of the inventions listed as Groups I-III requires **divergent** literature (patent and non-patent) and/or sequence searches, thereby establishing the serious burden of search.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Steadman, whose telephone number is (703) 308-3934. The Examiner can normally be reached Monday-Friday from 7:30 am to 2:00 pm and from 3:30 pm to 5:30 pm. If attempts to reach the Examiner by telephone are unsuccessful, the Examiner's supervisor, Ponnathapura Achutamurthy, can be reached at (703) 308-3804. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Art Unit receptionist whose telephone number is (703) 308-0196.
